INTRAMURAL BASEBALL.

The Intermural baseball season was officially opened Friday when the Independents met the Pi K. A.s. Maune started on the mound for the Pi K. A. team while Long did the Independent pitching. The Pi K. A. team held a one run lead until the last inning when the Independents went on a rampage, scoring 5 runs. The final score was Independents 11, Pi K. A.s 9. There was quite a bit of haggling over the game due to darkness; with the Pi K. A. team protesting the game. With the kind consent of the manager of the Independents, the game is to be played over.

The K. A.s, famous for their cellar positions apparently took a new lease on life in the sport world by downing the Triangles 9-8 in a close game. Dimond was the winning pitcher with Dresback holding the sack.

The Prospectors and the Bonanzas staged a 6-6 tie. Tuttle and Ray were the opposing pitchers. The game was called on account of darkness and will probably be played over.

It seems that there should be a time limit on the time for calling a game due to darkness. This is liable to cause confusion during the whole season, and a more strict rule should apply to the starting of the games. The schedule of the remaining games may be found on the bulletin board in Parker Hall.

BASEBALL PLAYERS

ATTENTION.

Again this year Mr. R. H. Jones will award a carton of Chesterfield cigarettes or a one pound can of Granger tobacco to each player hitting a home run in any Intramural game during the season of 1928. To obtain this award the home run must be a legitimate one and not one made through the errors of the opposing team. The players hitting home runs should see F. E. "Spike" Dennie for particulars.

GLACIER PARK IN WINTER.

The public lecture for the week of March 18th, sponsored by the School of Mines was on Glacier National Park, by the Engineer-Naturalist, Mr. R. E. McDonald of Kansas City.

Mr. McDonald said the park closed every year from October to June and few people realize the beauty of Glacier in winter, with every thing marble like.

The lecture was illustrated by both moving pictures and slides and escaped the tediousness of several other lectures of the winter.

Mr. McDonald's enthusiasm at once gave him a friendly audience. His story of a hike across a frozen lake, unarmed and just ahead of a hungry coyote had the listeners on their toes.

According to Mr. McDonald the finest part of Glacier Park is the western slope, which has not yet been discovered by tourist hotels, and abounds in game, fish and scenery.

TIGER! TIGER!

Who couldn't get a thrill out of a tiger hunt in an Asiatic jungle? Most of us have probably longed for an opportunity to track the jungle "cat" to his lair and come home with numerous tiger skins as trophies. But the majority of us will make these excursions only in the imagination, and next Thursday evening you will have a rare opportunity to make such an excursion into the wilds of Southern Asia. You will have as a guide Professor Richard Sutton, who is an experienced big game hunter and an interesting lecturer as well. Mr. Sutton is Professor of Dermatology at the University of Kansas, and is the author of a book entitled: "Tiger Trails in Southern Asia." His lecture next Thursday will bear the same title as his book, and will be illustrated by over 300 slides. The student body and the populace of Rolla should avail themselves of this opportunity to hear such a unique lecture.

M. S. M. SKETCHES IN ST. LOUIS POST-DISPATCH.

Two sketches of the M. S. M. campus appeared in the St. Louis Post-Dispatch on Tuesday and Wednesday of last week. The drawings were pencil sketches by Ruth Johns Hubbard, and the first pictured the so called Lover's Lane. This picturesque title was given to the road running north from the gymnasium, and in the sketch it lived up to its name. However, it remains to be seen whether or not the road can qualify.

The second sketch was entitled "Where the Rolla Miners Play," and showed a corner of Jackling Gymnasium and a corner of the athletic field, with the water tank in the background. The article accompanying this sketch was as follows:

Teams playing here have come and gone and have been forgotten, excepting one, the 1914 team. This eleven swept Missouri and neighboring states, laying low universities with enrollments many times that of the School of Mines and finishing the season with a grand total score of 541 points to their opponents 0. "1914" once in a lifetime! The Miners recorded it all over town.

There was Kis Kiskaddon of the backfield, at present a wealthy oil operator in Kansas; Joey Wilson, Big Joe, guard, now a high official with the people's Gas Co., in New York City and Pitts Bland, grandson of Silver Dick, now a successful insurance broker in St. Louis. There were others and the glories of the squad live on. Whenever the Miner Golden Wave goes down to defeat there is sure to be someone present who will sigh for a team "like that 1914 bunch."

Here among others, the Miners have met their ancient and honorable enemy, Drury. These two schools have maintained what is said to be a record in athletic relations west of the Mississippi. They have fought the good fight and have shared equally the glory. It is probable that the Miner-Drury game will become

Continued on Page Six.

INDEPENDENT SMOKER.

Saturday night the Independents held a smoker in the gym. About 75 members were present. The meeting was in the form of a general get-together meeting.

Several speeches were made by faculty members, and graduate students. Prof. Kershner commended the Independents upon their scholastic standing and various other things; a few words were added to his speech by Prof. Henning and Prof. Goodhue. Speeches were also given by "Spoof" Walker and Herman Kavalier.

After the speeches came the athletic events—wrestling and boxing. The first event was a wrestling match between Harry (Polinsky) Bolon and "Von" Bircher. Polinsky won the match in one fall in 4 minutes and a half—Polinsky won with the double toe and crotch hold. The second match was a boxing exhibition by "Snooker" Dillingham and "Uncle Bud" Walters. This match ended in a draw. The second boxing exhibition was between Kajar and Melvin Sharp; it also ended in a draw. The second wrestling match was between Dave Moulder and "Spoof" Walker. Dave and Spoof battled valiantly but neither one was able to out do his opponent, so this match also ended with a draw. The main scheduled bout of the evening did not take place. "Hard-boiled" Haggerty was scheduled to wrestle "Ocean" Bolon. Haggerty didn't show up, so the bout was forfeited to Bolon.

Next on the program came the story telling hour—"bedtime stories and otherwise, mostly otherwise. Col. Von Bircher won the first prize. Someone told a yarn that didn't have a point to it so the disgusted crowd choose up sides and went home.

BERYLLIUM PROMISES TO RIVAL ALUMINUM.

Beryllium may soon achieve the household familiarity that aluminum has won during the last two or three decades. It is a metal about a third lighter than aluminum, but is very much harder, scratching glass easily, like hard steel. H. S. Cooper, industrial chemist of Cleveland, who has been conducting extensive experiments, says it is one of the most remarkable of all metals in its elasticity. It is over four times as elastic as aluminum and 25 per cent more

elastic than steel. While aluminum corrodes easily on contact with salt water, beryllium shows very high resistance to this as well as to other metal-destroying liquids and fumes. It is light gray in color, and takes a polish like that of high grade steel.

It is chemically related to aluminum, and easily forms alloys with it. One of these, consisting of 70 per cent beryllium and 30 per cent aluminum, is one-fifth lighter than aluminum, far more resistant to corrosion, and in tensile strength far exceeds duralumin.

One quality, which Dr. Cooper points out, may render beryllium especially valuable to the automobile industry. It expands under the influence of heat at about the same rate as cast iron. Thus, when used for light pistons inside the iron cylinders of automobile engines, it will present far less engineering difficulties than do the present types of light pistons, which expand at a rate different from that of iron.

Until recently beryllium has remained merely a museum curiosity and a laboratory material, because it is so refractory that the cost of getting it in anything like a pure state has been prohibitive. But now that the cost of manufacture promises to be materially reduced by a new process it is probable that it will appear on the market in quantity within a few years.—Brass World.

Issued Every Monday.

With this issue of the Miner the renewed, revived and reconditioned staff makes its initial bow. It naturally follows that the new staff shall take this opportunity to outline, in a brief form, our policy concerning the future of the Missouri Miner.

In the first place we intend to maintain the high plane that has been reached by the retiring editor. He has had a thankless job, with much indifference and very little co-operation, yet his term has been marked by definite progress.

Secondly the Miner would have no excuse for existing if it did not provide an open forum for the expression of student and faculty opinion. Therefore we will welcome and solicit contributions from the faculty and student body both in the news department and in the editorial department. There is one reservation—since we are responsible for the policy of the paper we reserve the right to reject any article which we deem unwise to publish.

Thirdly we shall attempt to build

up a large staff from the student body, so that the Miner shall be a genuine news gatherer. Any man who will conscientiously and consistently help with the publication is certain of a position on the staff.

Furthermore we believe in criticism. Recognizing, of course, that criticism is a very dangerous tool, we intend to criticize only as an impetus to betterment. In other words we will deal only with constructive criticism, and only when criticism will help. On the other hand we hope the student body will freely criticize us and help us better the Miner.

Now that he have erected a platform the next thing in the customary procedure is to forget about it.

THE BAND.

There is an organization on the campus known as the M. S. M. Band, which should be one of the liveliest organizations of the school. But how can the band amount to anything with only 18 men reporting to practice. The director, J. W. Scott and the organization officers are doing their part and we would have a band which would be a credit to the institution if the members would only show a little cooperation. Last fall when the band was organized, 40 men received sweaters and 40 men made the Washington U. trip, but now they are lucky to have 18 men at a Tuesday night practice.

There are men wearing band sweaters who never make a pretense of attending practice and furthermore there are men wearing the sweaters who never have been connected with the band. The student body should cooperate with the band in this manner if you know a man who wears a band sweater, insist that he either attend band practice or turn in his sweater.

The above is written at the request of the president of the band, L. E. Reeve.

Varsity Baseball.

There seems to be quite a bit of discussion around the campus whether M. S. M. will have a Varsity Baseball team or not. There is plenty of first class material that would produce a winning team. But first we consider a method of raising money to send the team on trips. The Athletic Association hasn't the money for this, and it is up to the students to decide. The first thing to

consider is, will the students be willing to pay a small fee to see the games in order to make traveling expenses? If you are interested in his talk it up and express your views pro or con; and let's decide on this proposition. Last year a pickup team lost a 1-0 game and won a second game by a large score from the highly lauded Westminster team. It was Westminster's first defeat in three years. At that the Miners were given third place in the conference standing so come on Miners, let's win the conference and see some good ball games.

SIX HUNDRED NEXT YEAR.

About fourteen hundred inquiries have been received, so far this year, from prospective freshman. During the last year the enrollment at Rolla increased by almost one hundred, and it is fair to believe it can increase another hundred this year. Every student should try to bring a new man back with him next fall. Any man knowing of a high school graduate who is considering a technical education, should make it his duty to see that the graduate gets a M. S. M. catalog.

The best way to get a new student is by a personal talk. Take your Rollamo and snapshot album along and tell him all about the school life as well as about the equipment for teaching engineering subjects. If you should need any help go into consultation with Mr. Hubbard as he knows the way to secure new students.

TWO SEASONABLE THOUGHTS.

Lo and behold! The first day of spring has already sped on unnoticed and still we find no bubbling fountain to quench our thirst on the campus. The thirsty man may pause momentarily at the apparent oasis only to find no cool drink forthcoming. Would it not be expedient to free the much needed aqua for our dry and parched throats?

And, as regards the much neglected fountain by the gym staircase—it is a pity that this monumental pedestal has remained so sadly neglected. At present it is simply a block of stone standing as mute evidence of unthinking minds. Why not put it into actual service for our worthy track team and for the Wednesday military classes? Surely water was never so costly in this part of the world as to rob a man of his primary craving—thirst.

WE WANT MEN.

How to get good athletes. That is the source of worry at the University of Colorado. So pressing is the problem that The Silver and Gold gathered opinions from every possible source on the best ways for bringing high school stars Boulderwards, and published them for aid to patriotic students. The chief difficulty seems to lie in the University's reputation as a place where study is demanded. The Coloradans are valiantly trying to overcome this report, and the college paper advises students approaching high school desirables to make them understand that it is not hard to "stay in school." One criticism, made by a graduate of the University who is now principal of a high school, is this:

"To build a stadium holding 26,000 persons and then to apparently discriminate against athletes by means of entrance and scholarship requirements is certainly an inconsistency if there ever was one."

He proves, to his own satisfaction at least, that the institution would do much better with lighter emphasis on scholarship. All this, he makes clear, he has decided with "the interest of U. C. at heart."

—The New Student.

FOOTBALL PROSPECTS.

On Wednesday evening March 15, future Athletic Director, Harold Grant attended a meeting of the entire football squad. Plans and prospects for this coming season were discussed.

The Miner's first game next fall will be with the Washington University Bears; to be played at St. Louis on October 6th. If the present plans go thru the Miners will leave for St. Louis early Saturday morning, in busses and cars. This is being done because Grant wishes to take as many of the squad as possible. He says that he wants his entire squad to see all the games, if it can possibly be arranged.

A great deal of enthusiasm was worked up among the squad. Grant stated that he was bringing at least half a dozen A No. 1 football players with him, when he takes over the coaching job next fall.

Plans were made whereby the Miner squad will play a football game among themselves the week before the Washington University game. This is being done because the

officials were unable to schedule a game before the Washington game, and the Miners are going to be in tip top shape for the Washington game.

Grant practically outlined his whole coaching system to the squad, and it received an enthusiastic O. K. from the entire squad.

Naturally the football meeting would not have been a success without "Thorny", so he gave the squad a short talk on grade points. The Tau Beta Pi's and the Phi Kappa Phi's are organizing special tutoring squads for the football squad. In plainer words next season's football team is going to be grade point chasers as well as a winning team.

Grant and the squad ask for the same old hearty and loyal support from the students and the faculty. But the main idea is BEAT WASHINGTON.

TRACK.

At the start of the training season forty-five men signed up for track, out of that bunch only fifteen are reporting daily. What's wrong with this picture. Only one third of the men are really living up to their promise. Of course, there are ample excuses for some but not for all. We have the brightest track prospects that we have had in years, but with these men gone what could we do? We must have men for future years; if they are not good enough for a particular event, perhaps they could be developed. So let's have plenty of material out for the track squad. Plenty of meets are scheduled and there is a possibility of sending some men to the Western A. A. U. Indoor Meet at St. Louis, the last of March. The first meet is April 16th, with Arkansas U. —less than three weeks off.

INTERCLASS TRACK

MEET APRIL 7.

Jacking field will be the scene of the greatest array of athletes that has been seen since St. Pats on Saturday afternoon, April 7, when the Interclass track meet is held.

Anyone may enter who is able to do anything from rolling hoops to playing marbles. Here is a chance to get a name for yourself so come and get it.

The only rules of eligibility are to be in school, cut your fingernails and claw hard. Men who have made the Varsity M will run in the races and participate in the field but will not

be placed.

Advance dope—the Frosh are out for blood, and are confident of winning. They have not been out of training since the grand retreat last fall.

"Is Claude still mopping floors at the hotel?"

"Yes, he is the same old floor flusher."

—Princeton Tiger.

"I'm sorry to hear that your girl ran away with a football player."

"That's all right. He wasn't a very good player."

Wehre do you live?

In the nineteenth block. Why?

Oh, I always like to know how far I can go with a girl.

—M. C. M. Lode.

YOU BET.

There are meters of water

There are meters of light.

But the best of all meters

Is to meet 'er at night.

There are letters of accent

There are letters of tone.

But the best of all letters

Is to let 'er alone.

the Southern Missouri Turkey-Day grid classic beginning next Thanksgiving. These relationships were so well established so long ago that the oldest inhabitants cannot remember when, in honor of Drury, the Miners added a stanza to their picturesque school song, "The Mining Engineer."

I wish I had a daughter
I'd dress her up in green,
I'd send her down to Springfield

To coach the Drury team,
But if I had a son, Sir,
I'll tell you what he'd do,
He'd say, "To h... with Drury,
As his daddy used to do."

SHAKESPEARE ON
TOBACCO ADVERTISING

Hamlet:
To cough or not to cough, that
is the cigarette question.
Whether 'tis nobler in mind to
suffer

The fears engendered by unfounded claims,
Or to take no heed of a sea of
false alarms

And by ignoring them to smoke
in peace
so smoke we end

Once more. To say by pure tobacco
The heart ache and the thousand
natural shocks

That flesh is heir to, 'tis consummation

Devoutly to be wish'd. To smoke,
—to dream! Aye there's the nub:

For in that smoke of pleasure
what dreams may come

When we have shuffled off this
mental care

Must give us joy. There's the
respect

That we owe to pure tobacco
For who could bear the whips and
scorns of time,

The oppressor's wrong, the proud
man's contumely,

The pangs of dispriz'd love, the
law's delay,

The insolence of office, and the
spurns

That patient merit of the unworthy
takes,

Unless he himself might by smoke
escape,

Sans throat infection? Who would
these fangs bear?

To grunt and sweat under weary

But for faith in pure tobacco's

Heretofore undiscovered qualities

some brands claim, but

No authority verifies, puzzle the

will,

And make us rather cling by that

brand we know

Than fly to others, we wot not of.

Thus does prudence make wise

men of all;

And thus the native flavor of

tobacco is no false advertising

thought, too.

And enterprises of great pitch and

moment

With this regard their policies

turned awry

Then use the faith of smokers.—

Soft you now!

—Washington U. Dirge.

On Saturday of last week the
geology department made a trip to

Decaturville and Hahatonka. The

trip was made to study the uncon-

formity at the base of the Gascon-

ade and the complex faulting and

extensive igneous intrusives in the

vicinity of Decaturville. The trip to

Hahatonka was made in the return

to see the large spring, the sink hole

topography and the natural bridge

near the spring.

It is rumored that an extensive

and valuable deposit of iron was

found in the vicinity—in the

Dr. Dake, Prof. Bridge, Lynch,

Harmon, and Murphy of M. S. M.

made the trip and they were accom-

panied by Prof. Werner and Mr.

Hinche of the geology department

of Washington University.
